## Notes

\* Major exporters are countries that export—or are believed to export—at least USD 10 million worth of small arms, light weapons, their parts, accessories, or ammunition in a given calendar year. This edition of the Transparency Barometer includes all countries that qualified as a major exporter at least once during the 2000–01 period.

\*\* X indicates that a state submitted a report on activities in 2001. Reports provided for earlier years are indicated in parentheses.

## Scoring system

The scoring system for the Transparency Barometer provides comprehensive, nuanced, and consistent thresholds for the various categories. The Barometer's seven categories assess: timeliness as well as access and consistency in reporting (categories i–ii), clarity and comprehensiveness (iii–iv), and the level of detail provided on actual deliveries,

licences granted, and licences refused (v–vii). For more detailed information on the scoring guidelines, visit: <http://www.smallarmssurvey.org/weapons-and-markets/tools/the-transparency-barometer.html>.

## Explanatory notes

**Note A:** The Barometer is based on each country's most recent arms export report, made publicly available between 1 January 2001 and 31 December 2002.

**Note B:** The Barometer takes into account information that states have submitted to UN Comtrade for their 2001 exports through January 2010.

**Note C:** The fact that the Transparency Barometer is based on three sources—national arms export reports (including reporting to the EU Report), reporting to the UN Register, and UN customs data—works to the advantage of states that publish data in all three outlets. All information provided to the three sources is reflected in the scoring. The same information is not credited twice, however.
